Swap 2 No's ▾

SWAP 2 NO'S

C Program to Swap Two Numbers.
Swapping two numbers in C programming means swapping the values of two variables.
For example, there are two variables m & n. Value of m is "2" & value of n is "3".
Before Swapping: m value = 2; n value = 3
After Swapping: m value = 3; n value = 2
